

Content

(Modeling)

1. Introduction, Signals and System ✓

2. Modeling, Linearization ✓

3. Analysis 1: Time response, Stability ✓

4. Analysis 2: Diagonalization, Modal coordinates ✓

5. Transfer functions 1: Definition & properties ✓

6. Transfer functions 2: Poles & Zeros. ✓

7. Analysis of feedback system 1: Internal stability (root locus) ✓

8. Frequency response ✓

9. Analysis of feedback system 2: The Nyquist Condition. ✓

10. Specifications for feedback system ✓

11. PID Control ✓

12. Loop Shaping ✓

13. Implementation issues ✓

14. Robustness ✓
