

Autonomous Driving Stack

★ Autoware

- ⇒ Autoware was started in 2015 by Shinpei Kato at Nagoya University.
- ⇒ "All-in-One" open-source software for autonomous driving technology.
- ⇒ Autoware Foundation launched in 2018.

★ Autoware.AI

- ⇒ It is based on ROS 1 and available under Apache 2.0 license.
- ⇒ It contains the following modules:

① Localization

→ Achieved by 3D maps & Slam algo in combination with GNSS & IMU Sensors.

② Detection

→ Camera & Lidar with Sensor Fusion algorithms & deep neural network.

③ Prediction & Planning are based on probabilistic robotics & rule-based systems, partly using deep neural networks as well.

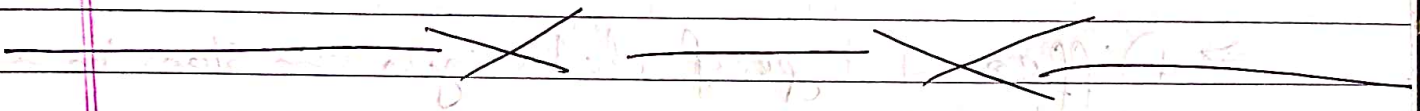

★ Autoware.Auto

⇒ Re-implementation of Autoware.AI

⇒ ROS2 based

⇒ Clearly defined APIs & interfaces for the different modules.

⇒ State-of-the-art development process CI/CD
